Module Overview

The Market module provides a complete path from market structure discovery to individual ETF research, comparison and saving. Users first establish market direction in **Market Intelligence**, then enter **Sector Detail** to compare ETFs within sectors, then conduct in-depth research in **ETF Detail**, and save the results to **Watchlist** or **My Portfolio**.

Data boundaries: When the page displays delayed quotes, cached snapshots or EOD (end-of-day) data, the corresponding tags must be retained. The Market module is used for research discovery and does not constitute trading advice.

User Story Index

Story	User story	Core path
US-MKT-01	Market Intelligence Home	Market Intelligence -> Sector Detail
US-MKT-02	Sector Detail	Sector Detail -> ETF Rankings
US-MKT-03	ETF Detail and Compare ETF	ETF Detail -> Compare ETF
US-MKT-04	Save ETF Research	Watchlist / Add to My Portfolio / Screener

Shared Terminology

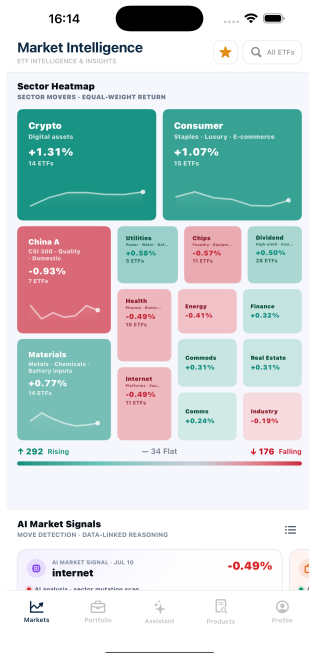

UI original text	Document meaning
Market Intelligence	Home page of the Market module, also the starting point for ETF research
Sector Heatmap	Heatmap that aggregates ETF performance by sector or theme
AI Market Signals	Card area that turns market movements into readable research signals
Market Discovery Rail	Horizontal discovery entry points for sectors, ETF movers, new ETFs, active ETFs and other scopes
Sector Detail	The details page of the selected sector
AI Sector Insights	Sector research observations generated based on EOD cache data
ETF Rankings	List of ETF rankings within the selected sector
ETF Detail	Detailed and chart research page for individual ETFs
Compare ETF	Normalized overlay comparison function of two ETFs
Screener	ETF search, filtering and sorting page with Recommended , All and Watchlist scopes

User Story 1 - Establish research direction from Market Intelligence

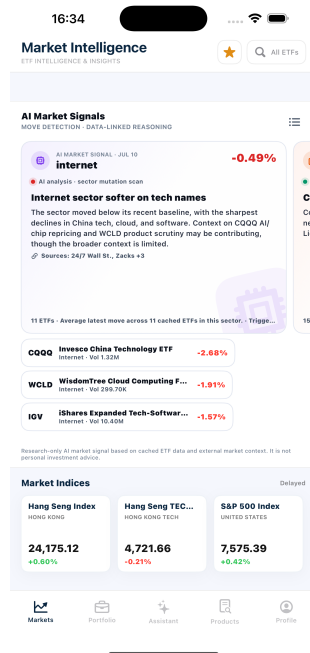

Story ID: US-MKT-01 **User story:** As a user who has not yet selected a specific ETF, I want to understand the day's market breadth, sector movements and major-index context so that I can choose a sector to research next.

Walkthrough

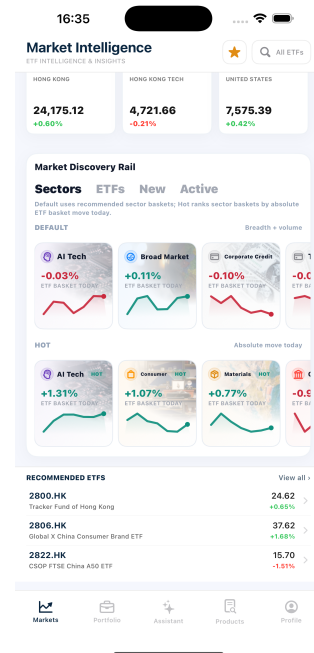

1. Open **Market Intelligence**. Show the overall structure of the page first and explain that it is a starting point for ETF research, not a complete ETF directory or trading recommendation page.
2. Browse the **Sector Heatmap**. Explain that each color block represents a sector or theme basket, showing equal weight changes, ETF volume and small trend lines; it also displays **Rising**, **Flat**, and **Falling** summaries.
3. Browse down to **AI Market Signals**. Select at least one signal card showing the signal date, market movement, AI analysis summary, related ETFs, and external sources when present.
4. Display **Market Indices**, including Hang Seng Index, Hang Seng Tech and S&P 500 Index, and keep the delayed data label visible.
5. Browse **Market Discovery Rail**. In the **Sectors** scope, show **Default** and **Hot** and explain that they provide stable entry points and sectors with large moves that day, respectively.
6. Show the symbol, name, price, daily move and **View all** action in **Recommended ETFs**.
7. Click on a section (it is recommended to use **Crypto**), enter **Sector Detail**, complete the current story and connect to the next story.

MKT-US1-01

MKT-US1-02

MKT-US1-03

MKT-US1-01 — Market Intelligence top with full Sector Heatmap containing Rising / Flat / Falling market breadth summary.

MKT-US1-02 — Complete AI Market Signals card with signal date, AI analysis, sources, related ETFs, and Market Indices with delayed tag.

MKT-US1-03 — Default / Hot sector baskets for Market Discovery Rail, as well as Recommended ETFs and View all.

Acceptance Criteria

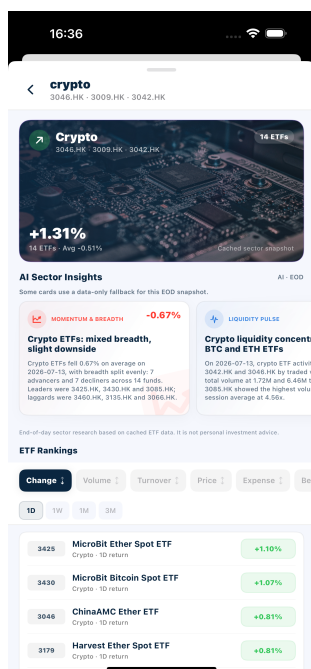

ID	Requirement	Reference	Ownership	Priority
MKT-US1-AC01	Market Intelligence loads successfully and organizes research entries into Sector Heatmap , AI Market Signals , Market Indices , Market Discovery Rail and Recommended ETFs .	US-MKT-01	Integration	Must
MKT-US1-AC02	Each visible color block in Sector Heatmap displays the sector/theme name, movement, ETF count and trend line, with colors distinguishing rising, near-flat and falling values.	US-MKT-01	Integration	Must
MKT-US1-AC03	Rising , Flat , Falling summary corresponds to the current heat map data.	US-MKT-01	Integration	Must
MKT-US1-AC04	AI Market Signals card shows signal date, detected changes, AI analysis summary and contributing/related ETFs; displays source reference when there is an external source.	US-MKT-01	Integration	Must
MKT-US1-AC05	Market Indices displays major indices and currently available change data, and clearly displays delayed data boundaries.	US-MKT-01	Integration	Must
MKT-US1-AC06	Market Discovery Rail supports continuing research from sectors, ETF movers, new ETFs or active ETFs.	US-MKT-01	Integration	Must
MKT-US1-AC07	The Default and Hot scopes in Sectors can be switched, and the displayed content is consistent with the current selection.	US-MKT-01	Integration	Must
MKT-US1-AC08	Recommended ETFs is a curated pool rather than the full ETF universe; each row displays symbol, name, price and daily move, and provides View all .	US-MKT-01	Integration	Must
MKT-US1-AC09	After clicking on a sector, the Sector Detail matching the selected sector will be opened.	US-MKT-01	Integration	Must
MKT-US1-AC10	The page does not represent market signals, sector performance, or select ETFs as trading recommendations.	US-MKT-01	Integration	Must

User Story 2 - Understand sector trends and filter ETFs

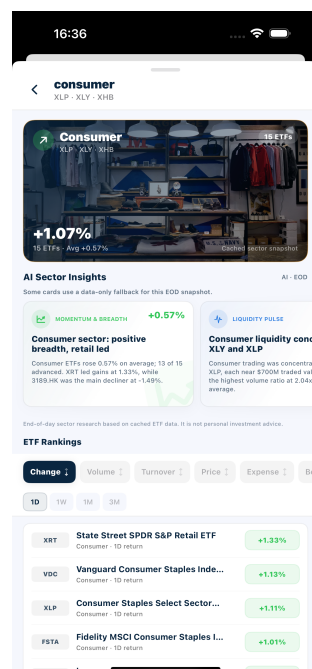

Story ID: US-MKT-02 **User story:** As a user who enters a certain sector from the market homepage, I hope to understand the breadth, liquidity and risk background of changes in the sector, compare ETFs within the sector, and select the next research target.

Walkthrough

1. Open a sector from Sector Heatmap or Market Discovery Rail. Use a sector with complete data, such as Crypto.
2. Display the top sector banner: sector name, representative tickers, number of ETFs in the basket, latest sector changes, and cached sector snapshot label.
3. Browse AI Sector Insights. Momentum & Breadth, Liquidity Pulse, Trend & Risk are displayed in order, indicating that these contents are based on EOD cached ETF data and are not real-time predictions.
4. Go to ETF Rankings. Confirm that the list only contains ETFs within the selected sector.
5. Switch 1 to 2 sorting indicators in sequence, such as Change, Volume or Expense Ratio; switch the return period again, such as 1D to 1M.
6. Select an ETF and enter ETF Detail to complete the transition from sector discovery to product research.

MKT-US2-01

MKT-US2-02

MKT-US2-03

MKT-US2-01 — Crypto Sector Detail banner, containing representative tickers, ETF count, sector move and cached sector snapshot labels.

MKT-US2-02 — AI Sector Insights for Consumer sector, showing Momentum & Breadth, Liquidity Pulse and EOD data boundary simultaneously.

MKT-US2-03 — Crypto ETF Rankings, showing Change sort, 1D return period and full ETF ranking rows.

Acceptance Criteria

ID	Requirement	Reference	Ownership	Priority
MKT-US2-AC01	Sector Detail displays the name and data for the sector selected by the user and does not retain content from the previously opened sector.	US-MKT-02	Integration	Must
MKT-US2-AC02	The sector banner displays representative tickers, ETF count and the latest sector movement.	US-MKT-02	Integration	Must
MKT-US2-AC03	The page clearly marks the sector snapshot / EOD cached data boundary and does not describe it as real-time data.	US-MKT-02	Integration	Must
MKT-US2-AC04	AI Sector Insights covers at least three research angles: Momentum & Breadth , Liquidity Pulse , and Trend & Risk .	US-MKT-02	Integration	Must
MKT-US2-AC05	When data is insufficient, the corresponding insight displays an unavailable state or data boundary and does not fabricate a conclusion.	US-MKT-02	Integration	Must
MKT-US2-AC06	ETF Rankings only displays ETFs within the currently selected sector.	US-MKT-02	Integration	Must
MKT-US2-AC07	Sorting supports metrics provided by the current implementation, including Change , Volume , Turnover , Price , Expense Ratio , Beta , Drawdown , Sharpe ratio , Name or Symbol .	US-MKT-02	Integration	Must
MKT-US2-AC08	return period supports switching between 1D, 1W, 1M, and 3M provided by the current implementation, and the list result is consistent with the current period.	US-MKT-02	Integration	Must
MKT-US2-AC09	When switching sorting indicators or periods, the current sector range remains unchanged.	US-MKT-02	Integration	Must
MKT-US2-AC10	After clicking on the ETF in the ranking, open the ETF Detail matching the symbol of the row.	US-MKT-02	Integration	Must
MKT-US2-AC11	AI Sector Insights uses the wording of research observations and does not predict returns or recommend transactions.	US-MKT-02	Integration	Must

User Story 3 - Research and compare individual ETFs

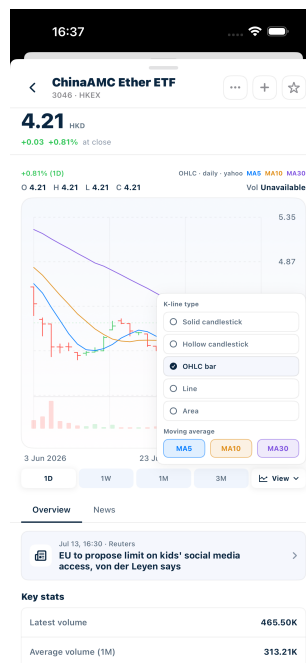

Story ID: US-MKT-03 **User story:** As a user who has selected a candidate ETF, I would like to view quotes, candlesticks, key statistics and news, and compare relative movements to another ETF.

Walkthrough

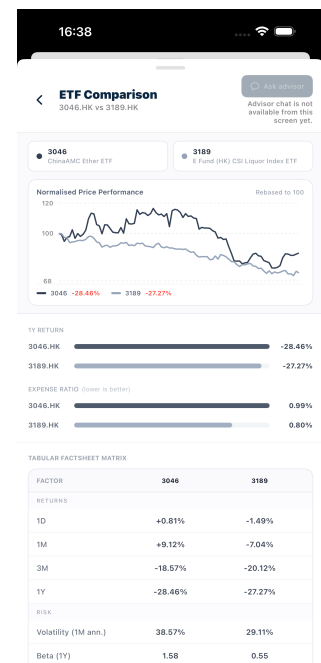

1. Open an ETF with complete data from **ETF Rankings**, **Recommended ETFs**, **All**, **Watchlist** or **ETF movers**.
2. Display detailed headers: fund name, symbol, exchange, latest price, currency, daily change and market/close status.
3. Switch at least two time ranges among **1D**, **1W**, **1M** and **3M** on the K-line chart.
4. Scrub the chart to display open, high, low, close and volume updates at the selected time point.
5. Open the **View** panel, switch the chart type once, and turn on or off at least one moving average (**MA5**, **MA10** or **MA30**).
6. Switch between **Overview** and **News**. Check key stats in **Overview**; display headline, source and timestamp in **News**.
7. Open **More**, go to **Compare ETF**, select the second ETF and view the normalized overlay under the same chart option.

MKT-US3-01

MKT-US3-02

MKT-US3-03

MKT-US3-01 — ETF Detail of ChinaAMC Ether ETF, including identity, quote, close status, K-line chart, moving averages, Overview and key stats.

MKT-US3-02 — View panel expanded, showing K-line types, current OHLC bar selection and MA5 / MA10 / MA30 controls.

MKT-US3-03 — ETF Comparison completed state, including 3046.HK and 3189.HK, normalized price performance, legend and factsheet matrix.

Acceptance Criteria

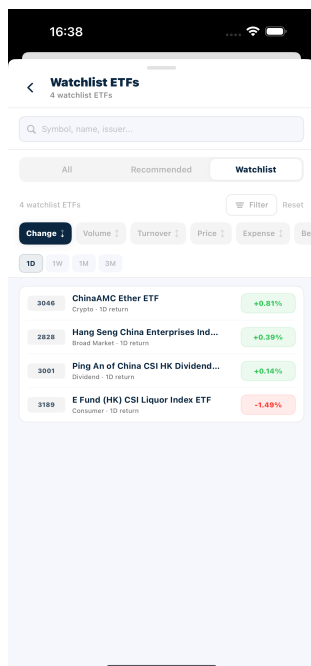

ID	Requirement	Reference	Ownership	Priority
MKT-US3-AC01	ETF Detail displays the fund name, symbol, exchange, latest price, currency, daily change and market status consistent with the selected ETF.	US-MKT-03	Integration	Must
MKT-US3-AC02	K-line chart uses the current ETF's price series and does not display residual data from previous ETFs.	US-MKT-03	Integration	Must
MKT-US3-AC03	Users can switch between the 1D, 1W, 1M, and 3M time ranges provided by the current implementation, and the chart will be updated with the selection.	US-MKT-03	Integration	Must
MKT-US3-AC04	When scrubbing a chart, open, high, low, close and volume are updated synchronously with the currently selected data point.	US-MKT-03	Integration	Must
MKT-US3-AC05	The View panel supports the currently enabled chart types in solid candlestick , hollow candlestick , OHLC bar , line and area .	US-MKT-03	Integration	Must
MKT-US3-AC06	The MA5, MA10, MA30 switches only change the current chart overlay, not the ETF or time range.	US-MKT-03	Integration	Must
MKT-US3-AC07	Overview displays the currently available key stats; unavailable values are shown with an explicit unavailable status.	US-MKT-03	Integration	Must
MKT-US3-AC08	News displays headlines, sources, and timestamps related to current ETF research streams.	US-MKT-03	Integration	Must
MKT-US3-AC09	Compare ETF in More uses the current ETF as the first comparison object and allows selection of a second ETF.	US-MKT-03	Integration	Must
MKT-US3-AC10	The comparison chart uses the same chart option to load two sets of price series, and displays the relative performance with normalized overlay.	US-MKT-03	Integration	Must
MKT-US3-AC11	Exit Compare ETF and still return to the details context of the original ETF.	US-MKT-03	Integration	Must

User Story 4 - Save ETF Research Results

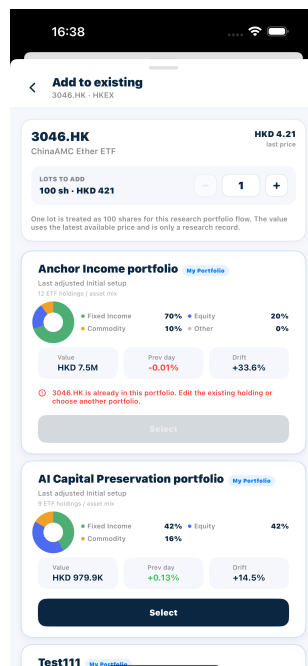

Story ID: US-MKT-04 **User story:** As a user who has completed preliminary research, I want to save an ETF to **Watchlist** for continued tracking, add it to an existing **My Portfolio** for further portfolio analysis, or continue screening through the unified **Screener**.

Walkthrough

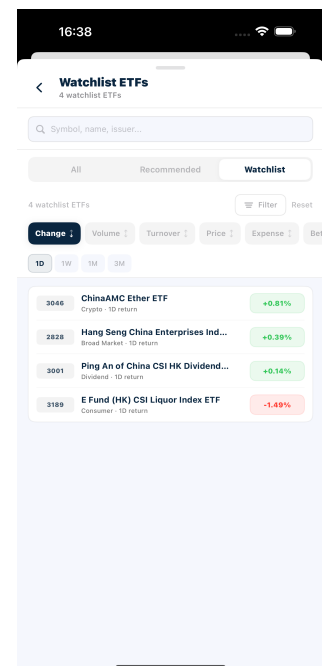

1. Click the star icon in **ETF Detail** to add the ETF to **Watchlist**.
2. Open the **Watchlist** tab of **Screener** and confirm that the ETF appears; then remove it and confirm that the list is updated simultaneously.
3. Return to **ETF Detail**, click the plus button to open the **Add to existing** portfolio sheet.
4. Display selected ETF, latest price, lots and estimated market value. Note: 1 lot is calculated as 100 shares.
5. Display the duplicate holding status: the portfolio that already contains the ETF displays a duplicate prompt and is unselectable; then select another eligible portfolio to save.
6. Re-open the target **My Portfolio** and confirm that the ETF has been saved as a holding record. It is emphasized that this process does not place orders or execute transactions.
7. Return to **Screener**, display the three data ranges of **Recommended**, **All**, and **Watchlist** in sequence, and operate search, filter and sort once.

MKT-US4-01

MKT-US4-02

MKT-US4-03

MKT-US4-01 — **Watchlist** ETFs save results, showing selected **Watchlist** tag, saved quantity and ETF symbol/name.

MKT-US4-02 — **Add to existing** sheet, including selected ETF, lots, estimated value, duplicate/disabled portfolio and eligible portfolio.

MKT-US4-03 — **Unified Screener** with **All** / **Recommended** / **Watchlist** scopes, search, filter, sort metric and return-period controls.

Acceptance Criteria

ID	Requirement	Reference	Ownership	Priority
MKT-US4-AC01	After clicking the star icon of ETF Detail , the success status is consistent with the actual saved status in Watchlist .	US-MKT-04	Integration	Must
MKT-US4-AC02	Saved ETFs appear in Screener > Watchlist ; disappear from the list when removed.	US-MKT-04	Integration	Must
MKT-US4-AC03	Watchlist is used to save research objects and does not create portfolio holdings or trading orders.	US-MKT-04	Integration	Must
MKT-US4-AC04	The plus button opens the Add to existing portfolio sheet for the current ETF.	US-MKT-04	Integration	Must
MKT-US4-AC05	The sheet displays the selected ETF, latest price, lots and estimated market value, calculated as 1 lot = 100 shares.	US-MKT-04	Integration	Must
MKT-US4-AC06	My Portfolio that already contains this ETF displays duplicate holding information and cannot be selected again.	US-MKT-04	Integration	Must
MKT-US4-AC07	User can select another eligible My Portfolio and save it.	US-MKT-04	Integration	Must
MKT-US4-AC08	After saving, reopen the target My Portfolio to see the corresponding ETF holding; it will not be written until it is selected and confirmed.	US-MKT-04	Integration	Must
MKT-US4-AC09	Recommended, All, Watchlist share the same Screener interaction, but are limited to the featured pool, the full available range and the user's saved range respectively.	US-MKT-04	Integration	Must
MKT-US4-AC10	search supports symbol, name or issuer; filter supports issuer, asset class, sector, currency or region provided by the current implementation.	US-MKT-04	Integration	Must
MKT-US4-AC11	sort supports change, volume, turnover, price, expense ratio, beta, drawdown, Sharpe ratio, name or symbol provided by the current implementation.	US-MKT-04	Integration	Must
MKT-US4-AC12	search, filter and sort do not accidentally switch the current Recommended, All or Watchlist data range.	US-MKT-04	Integration	Must

MKT-US4-AC13	Add to My Portfolio only saves research holding records, and the page does not claim that orders have been placed or transactions have been executed.	US-MKT-04	Integration	Must
--------------	---	-----------	-------------	------
